Projects

- E-Menu for Restaurants and Coffee Shops (https://themenu.ae/)

Role: Full-Stack Developer

Technologies: Laravel, Vue.js, MySQL, Css, Bootstrap

- Developed a digital menu platform that allows restaurant and coffee shop owners to create stores and showcase their menu items.

- Integrated an ordering system for clients to place orders directly through the platform.

- Implemented user authentication for store owners and ensured a responsive design for both desktop and mobile devices.

- Tours Reservation, Car Rental, and Driver Booking Website (https://dgotours.com/)

Role: Full-Stack Developer

Technologies: Laravel, Vue.js, MySQL, Css, Bootstrap

- Developed a comprehensive platform for tours reservation, car rentals, and driver bookings.

- Created a user-friendly website for customers to browse, book, and pay for services.

- Built an admin dashboard for service providers to manage reservations, track availability, and view analytics.

- Integrated real-time booking features, secure payment processing, and multi-language support for international users.

- Developer Registration Platform for Fresh Graduates (https://iewa.io/)

Role: Front-End Developer

Technologies: Vue.js, Nuxt.js , HTML, CSS

- Implemented the frontend logic for a platform that helps fresh graduates register and showcase their skills, based on designs provided in Figma.

- Developed a landing page and a dashboard for developers to input personal information and upload their CVs to attract recruiters.

- Focused on responsive design and user-friendly interactions using Vue.js, ensuring smooth registration and profile management.

- Real Estate Sales Platform (https://jozo.sa)

Role: Front-End Developer

Technologies: Html, Scss , Vue.js, Nuxt.js

- Converted Figma designs into responsive and interactive web pages, implementing a landing page and a dashboard for managing and showcasing real estate properties for sale.

- Developed features including a property listings page with advanced filtering and search options, detailed property information pages, and a property wallet for transaction management.

- Integrated API calls to dynamically fetch and display property data, ensuring seamless communication between the frontend and backend.

- Focused on delivering a user-friendly experience with responsive design and smooth functionality across devices.

- Hospital Maintenance Management Dashboard

Role: Full-Stack/Front-End Developer

Technologies: Vue.js, Laravel, MySQL

- Developed a dashboard system for hospital staff to manage and track maintenance tasks efficiently.

- Implemented real-time status updates, task assignment, and reporting features to streamline the maintenance workflow.

- Ensured a responsive design and an intuitive interface to enhance usability for hospital staff.

- Figma/Adobe Design to HTML, CSS, JavaScript Conversion Projects

Role: Front-End Developer

Technologies: HTML, CSS, JavaScript

- Converted multiple Figma and Adobe designs into responsive and pixel-perfect websites.

- Ensured cross-browser compatibility and optimized performance for both desktop and mobile devices.

- Collaborated closely with designers to bring their vision to life through clean and efficient code.

- Logistics Dashboard for Product and Order Management (LOGIMK)

Role: Front-End Developer

Technologies: Vue.js, HTML, CSS

- Developed the frontend logic for a logistics dashboard to manage products, orders, and tracking information.

- Integrated APIs from various platforms such as WooCommerce, Shopify, GLS, and Amazon for seamless data synchronization.

- Implemented features for real-time order tracking, product management, and reporting, ensuring a user-friendly and efficient interface.
