KEY ACHIEVEMENTS

Deployment Time Reduction

Reduced deployment time by 30% using Jenkins automation pipelines.

Cost Optimization

Optimized cloud infrastructure, decreasing costs by 25% annually.

Frequency Increase

Implemented CI/CD, increasing release frequency by 40%.

Successful Migration

Led a team to migrate applications to Kubernetes.

SKILLS

DevOps Tools & Technologies

Version Control: [Git](#) [GitHub](#)

SUMMARY

Passionate and dedicated DevOps engineer with a strong foundation in cloud technologies, automation, and continuous integration/continuous deployment (CI/CD) pipelines. Eager to contribute to innovative solutions and optimize development and operations processes. Expertise in cloud infrastructure, containerization (Docker), and orchestration (Kubernetes), leveraging tools such as Jenkins, Terraform, and Ansible. Always looking for opportunities to learn, grow, and apply industry best practices in an agile, collaborative environment.

EDUCATION

Bachelor of Business Administration - BBA, Business Administration, Management and Operations

[University of the Punjab](#)

02/2021 - 02/2023

CERTIFICATIONS

[Certified Ethical Hacker](#)

MY PASSIONS

Passionate about automating workflows, improving system reliability, and optimizing deployment pipelines. Strong interest in cloud computing, CI/CD practices, containerization, and infrastructure as code (IaC).
