Cairo-Egypt

Results-driven Software Engineer with hands-on experience in designing, developing, and deploying scalable web and backend systems. Proficient in modern technologies including React, Node.js, .NET, and cloud platforms such as AWS and Azure. Skilled in writing clean, maintainable code and implementing CI/CD pipelines, automated testing, and containerized deployments with Docker and Kubernetes. Strong foundation in database design, RESTful APIs, and microservices architecture. Proven ability to collaborate across teams and deliver high-quality software in agile environments.

Experience

Software Engineer in Interflow

20 Jan -present

- Assisted in developing responsive web applications using React.js and Next.js
- Worked alongside senior developers and designers to implement UI/UX features
- Learned and applied state management techniques for handling dynamic content
- Utilized state management to handle dynamic data and enhance user interactions.
- Supported integration of third-party APIs to expand app functionality
- Participated in testing and debugging processes to help identify and resolve issues
- Improved technical skills in JavaScript, front-end frameworks, and development tools
- Contributed to team meetings and code reviews, gaining exposure to agile workflows

internship Software Engineer in Career 180

10-October -18 Jan

- Collaborated with the design team to ensure seamless UI/UX integration.
- Utilized state management to handle dynamic data and enhance user interactions.
- Integrated third-party APIs for improved functionality and user experience.
- Conducted testing and debugging to optimize application performance.
- Strengthened skills in React.js, JavaScript, and front-end technologies.
- Worked effectively within a team, contributing to collaborative development processes

Courses

- Introduction to Software developer
- React from Basics to Advanced
- Introduction to Programming using C++
- Introduction to Backend developer SQL using .NET & C#
- Introduction to Mobile development using Kotlin

Certificate

- NTI graduated frontend developer
- NTI backend developer using C# and .Net
- ODC Orange Digital Center mobile development using Kotlin

Skills

- HTML5
- CSS3
- JavaScript + ES6
- Bootstrap
- React
- C++
- Tailwind
- Shadcn-UI
- Firebase
- Typescript
- Vue
- C#
- Database
- .NET
- Redux
- Jest
- Web socket
