## SUMMARY

---

**Motivated and self-driven Frontend Developer with solid experience in HTML5, CSS, JavaScript, and frameworks like React and Bootstrap. Proven ability to build dynamic, responsive, and user-friendly web applications through academic and personal projects such as MarketMate, Gallerita, a scientific calculator and a final graduation project HealthSync. Strong foundation in software development principles, project management, and system analysis. Equipped with excellent problem-solving skills, communication abilities, and a collaborative mindset. Actively expanding technical knowledge through internships and online certifications.**

## EDUCATION

---

**Faculty of Computer Science and Information Technology** — Assiut University

Bachelor of Information System (IS) | (Graduated 2025)

Cumulative GPA: 3.12 (Very Good)

Relevant Coursework: System Analysis, Project Management, Software Development

**High School** — Salam Prep Secondary Schools (Graduated 2020)

- Assiut, Egypt

## WORK EXPERIENCE

---

**Frontend Developer** | Self-Driven Projects

Remote | 2022 – Present

- Built **MarketMate System**, a dynamic product management platform using HTML, CSS, JavaScript, and Bootstrap.
- Developed **Simple Calculator** with advanced features like trigonometric functions, logarithms, and square roots.
- Created **Gallerita**, a dynamic image gallery with login functionality, responsive and interactive design.
- Completed a **Blood Bank System** project for the university's Project Management course.
- Completed a **Pharmacy Management System** for the university's System Analysis course.

## UNIVERSITY PROJECTS

---

**MarketMate System** (01/2025)

- Built a dynamic product management platform to manage products and categories efficiently.

**Gallerita – Dynamic Image Gallery** (08/2024 - 09/2024)

- Designed a user-friendly responsive image gallery including user login.

### **Simple Calculator (Advanced) (09/2024)**

- Developed an advanced web calculator supporting scientific operations.

### **HealthSync – Graduation project (09/2024 – 07/2025)**

- Developed an advanced web system using framework react and it was about making appointments and doing x-ray analysis and had chatbot with it “<https://healthsyncclinics.vercel.app>“

## **ADDITIONAL**

---

### **Technical Skills:**

HTML5, CSS, JavaScript, React, Python , jQuery, Problem Solving, Communication Skills, Time Management, Teamwork

### **Languages:**

Arabic (Full Professional Proficiency), English (Full Professional Proficiency)

### **Certifications & Training:**

- Front End Development Internship at CodeAlpha (10/2024)
- CS50's Introduction to Programming with Python – Harvard University (2023)
- Python Programming Basics – ITI Platform (2023)
- Introduction to Python Programming – Udacity (2023)
- Frontend Workshop at Petra Junior Program (2023)
