- Servicenow
- GitHub
- API integration

WORK HISTORY

SENIOR FRONTEND DEVELOPER 05/2022 to Current
Deloitte USI, Bengaluru

- Spearheaded healthcare transformation projects by leveraging data-driven strategies to improve both patient care and operational efficiency.
- Developed responsive, accessible UI components with Angular, TypeScript, RxJS, and Material Design to enhance interactions between patients and providers.
- Exposure to AEM, .NET application, Service Portal creation.
- Cross functional team collaboration.
- Integrated RESTful APIs to ensure smooth data communication between frontend applications and backend healthcare systems.
- Utilized NgRx for state management, enabling better handling of complex application states and enhancing maintainability.
- Collaborated closely with UX/UI designers to craft intuitive and user-friendly interfaces.
- Engaged in an agile environment, actively participating in sprint planning, requirement analysis, solution development, and code reviews. Created dynamic author able pages that offered clients greater flexibility in managing their content.

FRONTEND DEVELOPER 05/2019 to 05/2022
Cognizant Technology Solutions, Chennai

- Engineered and sustained Angular-driven insurance applications, facilitating efficient policy management and claims processing.
- Integrated real-time updates for insurance policies, premium calculations, and claims tracking through RESTful APIs.
- Crafted and executed dynamic forms utilizing Angular Reactive Forms and Template-driven Forms for both policy submissions and claims handling.
- Developed robust submission processes for credit and debtor information, emphasizing thorough validation and error management.
- Established component-based strategies for data sharing via Input/Output bindings, RxJS Subjects, and Services, ensuring effective communication between policy information, claims, and user dashboards.
- Conducted unit and integration testing with Jasmine, Karma, and Cypress to uphold application reliability.

UI/WEB DEVELOPER 11/2016 to 05/2019
Atos Syntel, Chennai

- Developed and sustained web applications for logistics and shipment tracking utilizing jQuery, JavaScript, HTML, and CSS. Created interactive UI components with jQuery for real-time shipment tracking, order management, and package status updates.
- Integrated RESTful and SOAP APIs to retrieve and update shipment information from .NET back-end systems.
- Enhanced user experience through form validations and dynamic UI interactions using jQuery and AJAX.
- Implemented secure authentication mechanisms using session storage, cookies, and protected API calls.
- Facilitated business continuity by transferring knowledge to new team members.
- Planned and executed knowledge transfer sessions, maintaining comprehensive records.
- Authored unit test cases to guarantee defect-free code delivery.

PROJECT EXPERIENCE

- **KAISER PERMANENTE** *(Health Care) 01/2023 -present* is an integrated managed care organization and providing both health care services and health insurance plans. For its B2B module, enabled the brokerage/agent to sell insurance by giving the ability to compare insurance. Created pages for advertising the plans, registering in the heath plan. Ability to view plans, latest news in healthcare.
- **EVEREST RE** *(BFSI) 06/2022 - 12/2022*- offers a variety of insurance products and services, including property and casualty reinsurance and financial lines. Worked on forms to maintain the user details, insurance details, modify and update it based on different user roles and access
- **EY HELIX***(Auditing) 09/2021 - 05/2022* - global audit analytics platform allows analytics to be embedded into every significant aspect of the audit. Gave the user an ability to upload the files for auditing, download, modify and delete the files .
- **NAVIENT** *(BFSI) 06/2019 - 08/2021*- deals with student loan servicing. Gave user ability to check the loan details. Edit,modify lenders and borrower details.
- **FEDEX***(Logistic and Retail) 03/2017- 05/2019* - The multinational courier delivery services company. It involved getting the user information,shipping/billing address, lookup for search, and payment page .Here the user cn also go and search their account created and modify the data.
