About me:

Motivated Full Stack Python Developer with practical experience in Django, Flask, and React. Skilled in building responsive, user-focused web applications, integrating databases and REST APIs, and contributing effectively within team environments.

Education

- Menoufia University
Bachelor's Degree in Computer Science and Information Sep 2019-Jul 2023
- Information Technology Institute (ITI)
Full Stack Web Development Using Python (Intensive Training Program)
Mar 2025 – Jul 2025

Projects:

- → **Parkly – Smart Parking System (React, Django)** — [↗ FE](#) • [↗ BE](#)
A web app for booking and paying parking spots. Built Django backend with Paymob integration, and developed map-based UI for real-time garage search. Supports roles: Driver, Garage Owner, Admin.
 - → **E-Commerce Platform (React.js)** — [↗ Repo](#)
Frontend for an online store with product filtering, cart, and responsive design. Designed reusable components and managed state for smooth shopping experience.
 - → **Movie Browsing App (React.js)** — [↗ Repo](#)
Single Page App for browsing and searching movies with live API data. Implemented search, API integration, and a clean UI for movie details.
 - → **Crowd-Funding Platform (Django, React)** — [↗ Repo](#)
Full-stack donation platform with login and donation tracking. Implemented authentication, backend logic, and frontend integration for seamless user flow.
 - → **Match Game (JavaScript)** — [↗ Repo](#)
Interactive memory card game built with JavaScript, focusing on UI logic and user engagement.
-

Technical Skills:

Programming Languages: Python, JavaScript, HTML, CSS, Bash
Frameworks & Libraries: Django, Flask, React.js, Bootstrap, jQuery
