Summary

Junior Backend Developer skilled in PHP, Laravel, and MySQL with hands-on experience in building scalable web applications and RESTful APIs. Strong understanding of OOP, database design, and backend architecture. Familiar with frontend technologies like HTML, CSS, JavaScript, and Bootstrap. Committed to writing clean, efficient code and contributing to collaborative, high-quality development teams.

Experience

- **Backend Developer at Qeyam** 04/2025 – 10/2025
 - Developed and maintained backend services for a comprehensive ERP system using Laravel.
 - Designed and implemented RESTful APIs, ensuring reliability and performance; tested endpoints extensively with Postman.
 - Refactored controllers and implemented Form Request validation, resulting in noticeably faster response times and more efficient application performance.
 - Successfully built and integrated the HR module, including:
 - Employee shifts, shift assignments, and attendance tracking.
 - Penalty management for delays/absences.
 - Added a Loyalty Points module, enabling customer rewards and retention features.
 - Implemented a Discount Codes system to support promotions and enhance sales operations.
 - Collaborated with cross-functional teams to ensure smooth integration of new modules into the ERP system.

- **Na3ml Initiative Trainee in Backend Laravel Track** 11/2024 - 02/2025

- **PHP Development Trainee at Digital Egypt Pioneers Initiative (DEPI)** 04/2024 - 12/2024

- **Graduation Project:**
Jobee [Github Link](#)

(Laravel , MYSQL , HTML5 , CSS3, Bootstrap)

- A job portal platform for job seekers in computer science related fields where users can create accounts ,view their personal profile ,edit profile details ,upload profile photos and resumes.
- Job seekers can explore diverse job opportunities or search for them using keywords, job title, job type or location and apply to jobs or save them for later.
- Admins can access a dashboard where they can view users and jobs and manage them.

Projects

- **Blog** [Github Link](#)

(Laravel , MYSQL , HTML5 , CSS3, Bootstrap)

- A dynamic blog platform where users can create accounts ,view their personal profile ,edit and delete accounts , explore diverse posts, and engage through comments.
- Users can follow authors and subscribe for updates and receive mail notifications.
- Users can search for posts based on categories , authors and tags.
- The Admin can access a dashboard where they can add ,edit or delete posts and categories.

- **Invoices Management System** [Github Link](#)

(Laravel , MYSQL , HTML5 , CSS3, Bootstrap)

- A website for managing invoices where admins and users can track the invoices statistics through the home page.
- Users can select the website language (English or Arabic) from a dropdown menu.
- Admin and user roles and their permissions are managed by the super admin based on database roles-permissions where users can have multiple roles and each role has many permissions which are secured using middlewares to avoid unauthorized actions. Roles and authorities can be added edited or deleted only by the Admin.
- Admins can add ,edit and delete sections and products and view invoices and clients reports where they can search for invoices using invoice type ,number or section and product in addition to start and end date to limit the search to a specific time period.
- Admins and Users can create, edit ,delete and archive invoices and add , delete or download invoices attachments.
- Admins and Users can also copy invoices and change their payment status to categorize invoices to paid ,partially paid and unpaid invoices.
- Admins can receive notifications for adding invoices by any user made using database notifications.

Trainings

- | | |
|----------------------------------------------------------------------------------------------------------------------------|----------------|
| - Web Development Internship at Technohacks | 03/2024 |
| - Web Development using PHP Summer Training at Information Technology Institute | 08/2022 |
| - Backend Development (PHP /MYSQL/LARAVEL) Summer Training at Consulting of Computers and Information Center (CCIC) | 08/2021 |

Skills

- Technical Skills:
 - Programming Concepts: Data Structures , Databases , Object-Oriented Programming (OOP) , API Development(using Postman)
 - Programming Languages: PHP , JavaScript
 - Frameworks: Laravel
 - Database Management: MySQL
 - Frontend Languages: HTML5, CSS3 , Javascript , Bootstrap
- Tools:
 - Postman, Git, GitHub, VS Code, Composer
- Soft Skills:
 - Time Management | Self-Motivation | Problem Solving | Effective Communication | Attention to Detail | Teamwork & Collaboration | Accountability | Adaptability

Education

Bachelor's Degree in Computers and Information

10/2019 – 6/2023

Mansoura University

- BIOINFORMATICS Department
- Overall Grade: Excellent
- Graduated with (A) degree with honors and as the 6th on my class

Languages

- | | |
|-------------------|------------------------|
| • Arabic : Native | • English : Proficient |
