### Some information about me:

I graduated with total grade of 79.3% as very good with honor rank

With excellent final project From Shoubra faculty of engineering. Benha University.

Electronics and communications department

I am a v-good English speaker and writer

I like self-learning and keep up to date

## Adjectives:

hard worker - deterministic - creative - learning inquisitive as I am in entry level but i want to learn new things - idea maker

#### Brief notes for Projects that I worked on:

• the final project that was fire-fighting robot

During this project I worked on (Zigbee – Arduino – android app-Node MCU –solid works – motor shield with motors and encoders – PID control- servers)

The robot can reach the on fire place with 2 modes

- (manual) the robot can be controlled with android app for priority achieve
- (Automatic ) the robot can know the where is the fire and go to it automatically and extinguish the fire
- We participated in ITI maker Hackathon

• Telecom Egypt company training In communication and electronics field

• line follower robot

I applied for 2 competitions for line follower robot In shoubra x competition and Mecato company competition We got places in the 2 competitions with only self-study making V good PID control

• Project robot avoiding obstacle (embedded system)

During this project I worked on (Arduino - robot design using solid work - motors - motor shield)

- tic tac toe game with logic gates (logic gates)
   During this project I worked on (logisim program)
- full project GUI (graphic user interface ) java program (programming)

- power supply circuit support -ve and +ve volt values (electronics)
- full communication system (transmitter and receiver ) design on protues simulation program (communication system)
- simple projects on (labview program using myrio kit)
- Matlab and Simulink projects with graphs (high level language programming )
- couple reverse flashing led using 555 timer IC (electronics)
- packet tracer program

   I made simple projects about configuring routers and switches
   Setting up simple networks with routers and switches and pcs
   And I was trying to self-learning CCNA online courses

#### Student activity:

GSA (Google student activity)

Media department

#### Working experience:-

Working in 4s-sphinx company as installation and configuration engineer for security systems in big project for Atomic Energy Authority (ETTR1 –ETTR2)

- Security systems as:-
  - network installation and configuration with fiber cables
  - CCTV system
  - intruder systems
  - access control systems

#### Scholarship:-

- CISCO / NTI (national telecom institute ) cyber security scholarship for 3 months(Marsh 2018-May 2018) studying :
  - CCNA
  - CCNA security
  - Linux
  - SDN
  - Cyber security Essentials
  - Cyber security operations
  - Final Project of hacking Wi-Fi and secure it with radius server on Linux
