Hello
I'm Ala'a Abu nimeh

AMMAN, JORDAN
(00962) 79-6870638
alaabunimeh@gmail.com

Objective

Seeking a challenging role, where I can leverage my extensive experience and technical expertise in iOS development to contribute to the creation of cutting-edge mobile applications. With a proven track record of iOS development, driving architectural decisions, and delivering high-quality solutions, I am dedicated to pushing the boundaries of innovation while ensuring seamless user experiences. Passionate about continuous learning and mentoring others, I am committed to fostering a collaborative environment and driving the success of both projects and team members.

Experience

January 2023 - PRESENT

eScan Plus, AMMAN, JORDAN – **iOS technical team leader**

- **Technical Leadership**: Lead and mentor a team of iOS developers, providing guidance on best practices, code reviews, and technical solutions to ensure high-quality, scalable, and maintainable code.
- **Architecting Solutions:** Design and implement complex iOS application architectures, including the use of design patterns (MVC, MVVM, VIPER) and ensuring adherence to performance, security, and usability standards.
- **Code Quality & Best Practices**: Ensure adherence to coding standards, guidelines, and automated testing practices, including unit tests, UI tests, and continuous integration (CI) processes.
- **Technical Problem-Solving**: Provide technical expertise in solving challenging bugs, performance issues, and complex implementation problems, and assist the team in debugging and troubleshooting production issues.
- **CI/CD and Deployment**: Lead efforts to set up and maintain continuous integration/continuous deployment (CI/CD) pipelines for iOS applications, ensuring smooth and automated deployment processes to the App Store.
- **App Store Management & Compliance**: Oversee app submissions to the App Store, ensuring compliance with review guidelines, optimizing app metadata, and managing promotional assets. Monitor app reviews, address post-launch feedback, and analyze performance through App Store analytics to drive ongoing improvements.

Education

January 2008 - January 2013

Applied Science University, AMMAN, JORDAN – *B.Sc. Computer Science*

Awards

Achieved first place university-wide in the Graduation Project titled "Computerized Monitoring System" which is a smart house technology to control house lighting locally with a computer or by voice recognition to help people with special needs. Additionally, a web interface for performing the same function was implemented.

Included in the project was a complete physical prototype of house connected to an external USB circuit board with a microchip that we programmed with Micro Basic

SOFT SKILLS

- Problem Solving.
- Critical Thinking.
- Time Management.
- Good communication skills. Teamwork.
