## OBJECTIVE

Futuristic and forward-thinking UX designer with 6+years of experience working with high-profile companies to create effective usability design processes. Highly experienced in creating beginning web concepts utilizing wireframes and quick to high fidelity prototypes, employing technology, user-centered design, usability testing, interactive design, and business strategy. Create designs for more than 25 websites. Thrives in collaborative environments, working alongside business owners, vendors, clients, developers, and other stakeholders. Aiming to join an organization where I can apply my expertise in usability testing, wireframing, prototyping, and visual design.

## EXPERIENCE

January 2020 - 2024

**UI/UX Designer** – *On-Site, Saudi Arabia*

Know user and his brand. Perform user research. Determine the needs, goals, habits, and pain points of the user. Visual appeal I construct site maps, wireframes, prototypes. Perform user testing Track how real people engage with the product or service to validate the design (usability testing). Detect any design flaws and come up with fixes.

January 2025 - Present

**UI/UX Designer** – *Remotely, Egypt*

Know user and his brand. Perform user research. Determine the needs, goals, habits, and pain points of the user. Visual appeal I construct site maps, wireframes, prototypes. Perform user testing Track how real people engage with the product or service to validate the design (usability testing). Detect any design flaws and come up with fixes.
