PROJECTS

1-Islamic Website

React, Redux Toolkit, Formik, Tailwind CSS, DaisyUI, AOS, FontAwesome, Vite

- Responsive and User-Friendly Design: The website boasts a design that adapts seamlessly to various screen sizes
- Integration with Islamic APIs: The website interacts with Islamic APIs to retrieve relevant content such as Hadiths, Quran and more.
- Pagination allowing them to move between hadiths efficiently and effortlessly.
- Abdelmoniemhgagyy/Quanton
- quantoon.vercel.app

2-Odoo Hospital Management System

Python, Odoo Framework, PostgreSQL

- Developed a custom backend module `om_hospital` for managing hospital operations within Odoo ERP.
- Designed models to handle patients, doctors, appointments, and departments with proper relations and constraints.
- Created dynamic views: tree, form, kanban, and calendar for efficient data management.
- Implemented automated workflows using Odoo server actions and scheduled jobs.
- Defined user roles and access rights to enforce security and data segregation.
- Used Odoo's ORM and XML architecture to create a fully integrated and maintainable solution.
- Abdelmoniemhgagyy/odoo/tree/master/om_hospital

3-Book Store Website

React, react-router-dom, ContextAPI, react-toastify, lottie-react, @formspre/react, CSS

- Built a responsive Single Page Application (SPA) for browsing and ordering books.
- Implemented form validation with guided error messages to enhance user experience.
- Designed a clean, user-friendly interface for easy navigation and order management.
- Enabled quantity selection and order customization.
